

# Biolaw and Ethics Program

## 20-25 July 2015, Sounion, Athens, Greece

“Biolaw” is one of the most dynamic and evolving fields of law, born out of the field of bioethics. Biolaw explores the legal and conceptual basis for bioethics, and plays a pivotal role in the research, development and use of biotechnologies in the medical and health services, as well as in the pharmaceutical and chemical industries.

**The EPLO's Certificate in Biolaw and Ethics can be taken on its own, or, as the first step towards the EPLO's LL.M. in European Biolaw and Ethics**
