Market Democracy: Wedge into society?

Further to the Greek case

Central issue: *In Member States of the European Union like Greece, voters are invited to decide on major issues related to their welfare status and with far-reaching effects on the future, while such choices basically bear on systemic issues which reach deep into the institutional premises of the Western society as a market society. Experts advise on this basis often in ways unjust or unpleasant to the electoral body. What is at stake in terms of legitimacy of decisions?*

THEMATICS

European Politeia

The Journal

European Politeia [ISSN 2409-5621 (print version)] is a bi-annual journal of European law, public affairs and society published by the European Public Law Organization under the scientific supervision of the Greek Center of European Studies and Research (EKEME) of the EPLO.

The aim of this publication is to provide an additional forum for the ongoing debates on a broad range of issues and particularly those that transcend individual countries. It will hopefully make relevant voices from the South of Europe more accessible to a broader audience. It will be a rewarding exercise to draw from the expertise of many scholars from Greece and other countries. The publication will be open to various theoretical and political perspectives that spring from different experiences and methodological traditions. We do not intend to narrow the frame of the debates.

The Publisher

The European Public Law Organization (EPLO) is an international organization dedicated to the creation and dissemination of knowledge in the area of Public Law *lato sensu* and Governance, including but not limited to, *inter alia*, national, comparative and European public law, human rights law and environmental law and the promotion of European values for a better generation of lawyers and democratic institutions worldwide. The EPLO was established in 2007 in Athens, Greece, as the continuation of the European Public Law Center (EPLC), a non-profit institution of international character, established in 1995 under the Law of the Hellenic Republic. To this date, it has developed, organized, promoted and supported close to 200 educational, research, training, institution building and other activities and has provided assistance to democratic institutions in more than 70 countries. In order to accomplish its purposes, the EPLO promotes the cooperation with other institutions, organizations and bodies, in particular organizations in the United Nations system.
