

Christos Tsitouras

Christos Tsitouras is an environmental engineer with academic and professional expertise in circular economy, ESG, and sustainable development. He holds an M.S. in Sustainability Management and an MBA from Stevens Institute of Technology (NJ,USA), as well as an M.E. in Environmental Engineering from the Technical University of Crete. He has also completed a certificate in Sustainable Investing from Harvard Business School.

Christos is the Founder of GeminiGrowth Advisors, a newly established advisory firm offering consulting services in ESG strategy, environmental innovation, green finance, and climate transition planning, while also engaging in traditional business consulting. He has gained experience across the consulting, infrastructure, and energy sectors, contributing to projects involving sustainability reporting, smart city development, energy systems, and environmental licensing.

He has received recognition for capstone projects during his master's studies on sustainable aviation fuels and strategic waste mitigation plans, while his academic work includes a thesis on microplastics in wastewater treatment systems. Christos actively engages in initiatives that promote circular economy practices, environmental resilience, and systems innovation.
